

Western Region Council on Forest Engineering

January 2016

R&D Labs – Field to Lab to Math

Enables fast to market and improved product reliability

- Improved first time pass rate of designs
- Increased speed through Product Development Process (PDP)
- Increased reliability of designs
- Less reliance on field testing as primary validation method
- Increased efficiency of resources
- Enables *engineering excellence* culture

2016 Scope includes Field to Lab for Harvester Chain Durability

- Focused on Safety and Reduced Chain shot

- Full-line of Harvester products

• Thank You for being our customer
